

# INFORMATION SYSTEMS INTEGRATION

OPTIMISING BUSINESS DATA

Information Systems Integration is a multifaceted company consisting of two core areas of expertise:

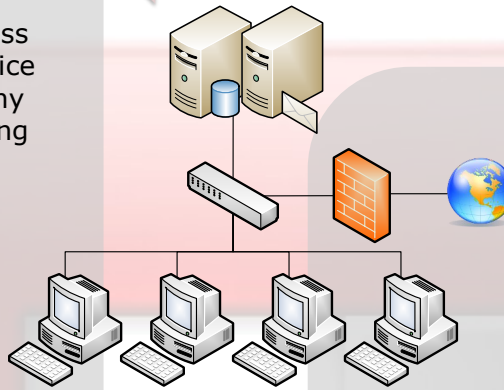

**Information Systems Integration** specialises in providing leading IT solutions for **Small to Medium sized businesses**.

Our goal is to provide your business with a **high level of quality** service at a reasonable price. Our company offers a variety of services including complete IT **hardware** and **software** solutions, support for various network infrastructures, **troubleshooting** and consultancy.

Whether you are looking for a **new** networking solution or are considering **upgrading** your existing infrastructure, Information Systems Integration can help your business achieve **maximum productivity and reliability** through a state-of-the-art IT solution designed to meet your specific needs.

- Network Solutions
- IT Sales and Support

IT Solutions

**Security** is a **top priority** for us and your business, therefore we settle for nothing less than **market leading security Antivirus (CA)** and **Firewall (SonicWall)** solutions.

Companies are becoming more and more mobile due to the rapidly growing wireless market. We provide up-to-date **wireless solutions** (Linksys) that will help give flexibility and reliability for those on the move.

To provide your company with maximum productivity and reliability, we recommend industry **leading hardware**.

From experience, we have found **HP** to have an excellent overall track record with hardware manufacturing. However, we are not limited to HP. We also supply **Acer, IBM,** and **Toshiba** business range products.

**Fact:** HP holds the leading position in global PC sales, with a market share of close to 20%

The logos below are a representation of some of the companies we are **partnered** with and the hardware and software we **supply** and **support**.

**Industrial Automation**

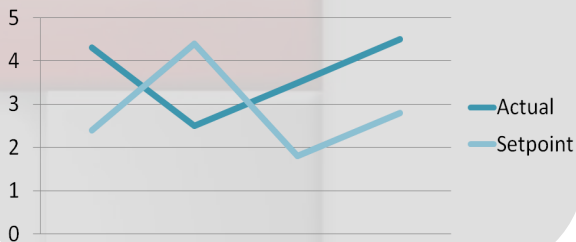

- PLC Programming
- SCADA Solutions

**Information Systems Integration**

specialises in providing leading **PLC** (Programmable Logic Controller) and **SCADA** (Supervisory Control And Data Acquisition) solutions to manufacturing companies.

Building on the strengths of our expertise in both IT networking and Automation, we offer customised solutions that will track and **report live plant data** through both SCADA and local intranet **web reports**.

Information Systems Integration can transform your **basic** factory network architecture into a **complex** automation and reporting infrastructure.

Reports of **live and historic data** are made available through the local company intranet. This allows **anyone** with network access to **view, analyse, print** and even **email** the reports.

Plants require dependable hardware in order to **avoid costly downtime** in production. To avoid such scenarios we use Allen-Bradley controllers which have proven reliability in the most demanding manufacturing environments.

**Fact:** The Panama Canal infrastructure is controlled by Allen-Bradley Logix controllers.

We use proven industry standard reporting and database software (SQL Server) to produce **comprehensive**, integrated database management and **analysis solutions** that provide **reliable** management of mission critical information

Microsoft® **SQL Server**

**Rockwell Automation**

Information Systems Integration is a **registered Rockwell Automation systems integrator**. Rockwell has built a solid reputation over the years for providing **reliable programming software**. Many large manufacturing companies such as **General Motors** in the US **choose Rockwell** products for this very reason.

For close to a century, **Allen-Bradley** has been a competitive **hardware manufacturer** in the automation industry. Acquired by Rockwell Automation in 1985, the **combination** of these two leading companies has produced many outstanding **hardware** and **software** automation products.

**Allen-Bradley**
